WARRINGTON RURAL DISTRICT COUNCIL
ANNUAL REPORT OF THE MEDICAL OFFICER.
OF HEALTH FOR THE YEAR 1962.

TO THE CHAIRMAN AND MEMBERS,
WARRINGTON RURAL DISTRICT COUNCIL.

Mr. Chairman, Madam and Gentlemen,

I have the honour to present for your consideration, the Annual Report of the health and sanitary conditions in the Warrington Rural District During 1962.

The number of births in the year rose again, from 653 in 1961, to 756 which gives a Crude Live Birth Rate of 22.8, and an Adjusted Live Birth Rate of 21.8, per 1000 population. This rise in the birth rate is shown very clearly in the Table on page 10 which gives Comparative Statistics for the past 5 years. The number of illegitimate births fell from 18 in 1961 to 15, and this gives the low figure of 2% when expressed as a percentage of the total number of live births. The Peri-natal and Infant Mortality Rates showed very welcome decreases. These rates are often considered to be indices of the state of an environment and degree of affluence in a community. The number of deaths of infants under 1 year of age was 14 and the Infant Mortality Rate was 18.5. The Peri-natal Mortality Rate (Stillbirths and Death in first week of life per 1000 total birth) was 18.3.

The total number of deaths was a little more than in 1961, although the rate per 1000 of the population actually fell from 11.8 to 11.5 for the Crude Death Rate, the Adjusted Death Rate being 11.6. The number of deaths from Lung Cancer rose by 1; there were 14 deaths in men and 1 in women. Of these deaths, 13 occurred in men of 65 and under.

Nearly 28% of all Cancer Deaths is due to Cancer of Lung. More publicity is required to emphasise the dangers pointed out in the Report of the Royal College of Physicians which was published during the early part of the year under review.

It is very pleasing to be able to record, for the first time, a nil return of deaths from Respiratory Tuberculosis. Respiratory Tuberculosis, such a killing disease for such a long time, is gradually being overcome by modern methods of treatment which rely to a great extent on the antibiotic drugs discovered in recent years.

I should like to take this opportunity of thanking members of the Council for their interest in matters of Public Health, and Mr. Morrison, Chief Public Health Inspector, for his support and help throughout the year.

I am, Mr. Chairman, Madam and Gentlemen,
Yours obediently,

R. ELLIS JONES
Medical Officer of Health

S E C T I O N I

PHYSICAL CONDITIONS AND GENERAL DESCRIPTION

The Warrington Rural District is situate in the South-West of the County of Lancaster. It is bordered on the North by the districts of the County Borough of St. Helens and the Urban Districts of Newton-le-Willows and Golborne; to the East is the Urban District of Irlam, and on the West is the Rural District of Whiston and the Borough of Widnes. The southern boundary, which is also the County boundary, is the Manchester Ship Canal, and the northern perimeter of the Warrington County Borough.

The area of the district is approximately 35 square miles being 14 miles from east to west, with a narrow waist of about two miles in the centre between Warrington and Newton, broadening to an average width of about six miles.

Agriculture is the principal occupation in the area, but there are in the more urban parishes a variety of industries, including light engineering, brewing, brick making and paint manufacture.

The area is, as a whole, comparatively low-lying with only a gentle undulation to relieve the otherwise flat landscape. The fall of the land is to the South, with streams and brooks discharging into the River Mersey, which winds its way across the southern portion of the district only slightly to the north of the Manchester Ship Canal.

DISTRICT STATISTICS

Area (acres)	22,733
Estimated population (mid. 1962)	33,230
Number of inhabited houses and flats	9,852
Rateable Value	£371,383
Sum represented by ld. rate	£1,541
Births assignable to District	756
Deaths assignable to District	382

DEATHS

The total number of Deaths registered in the District was 290, 37 of these were of persons whose usual place of residence was outside the District; these have been assigned to the areas in which they formerly resided.

129 deaths of persons normally residing in this area, but dying elsewhere, have been included in the total deaths properly assignable to this district.

SECTION IV

FOOD HYGIENEFood and Drugs Act, 1955

The following details of food samples taken under the above Act, have been supplied by the County Medical Officer of Health.

A total of 143 samples were obtained, consisting of 128 samples of milk (9 of which were Channel Islands milk) and 15 others comprising:-

- 1 Beef sausage
- 1 Pork sausage
- 1 Bicarbonate of Soda B.P.
- 2 Piccalilly
- 3 Pickles
- 2 Salted peanuts
- 1 Chocolate covered raisins
- 1 Beef curry, canned
- 1 Canned corned beef
- 1 Ground almonds
- 1 Mixed nuts and fruit

I give below details of those samples upon which the County Analyst gave adverse reports.

<u>Type of Sample</u>	<u>Result of Analysis</u>	<u>Action taken</u>
1 Ground almonds	Acid value of extracted oil 18.4. Sample had stale taste.	Withdrawn from sale.
1 Mixed nuts and fruit.	No walnuts present although these are claimed on list of ingredients.	Packers communicated with

FOOD PREPARING PREMISES

All premises used for the preparation and storage of foodstuffs, grocers, butchers, ice-cream suppliers, bakehouses, street traders and food delivery vehicles were inspected. The supervision of canteens in factories, etc. is included in Section VII of this Report. It was not found necessary to take legal proceedings for non-compliance with regulations.

Food Preparing Premises

Type of Business	Number	Inspections
Grocers and Mixed General.. .. .	65	113
Butchers	8	25
Fried Fish Shops.	8	16
Cafes and Mobile Snack Bars	8	26
Ice-cream Vendors	36	-

Ice-Cream

Number of Retail Vendors registered.. .. .	36
Number of Bacteriological samples taken	23
Result of Samples Grade 1 ..	19
Grade 2 ..	3
Grade 3 ..	1
Grade 4 ..	-

In general it may be taken that Grades 1 and 2 are satisfactory, and we thus only had one unsatisfactory sample out of a total of 23.

There is no ice-cream manufactured in the area, and the retailers now registered sell pre-packed ice-cream only.

Milk Supplies

Routine milk sampling has continued throughout the year for the purpose of bacteriological analysis, which aims at ensuring a general standard of purity as regards the total number of organisms which affects the keeping quality of the milk (Methylene Blue Tests), the efficiency of pasteurisation processes (the Phosphatase Test) and is concerned specifically as to the presence in the samples of the bacillus of tuberculosis, the bovine species of which is of course the cause of tuberculosis diseases in bones, joints and lymphatic glands, and may also attack other organs of the body.

HEAT TREATED MILK	No. of Samples	No. Unsatisfactory
"Pasteurised Milk"		
Phosphatase Test	80	-
Methylene Blue Reduction Test ..	72	8

Inspection of Meat and other Foods

The bulk of this work continues at a Bacon Factory where line dressing is in progress and which places on the Inspector a responsibility which has to be resolved within probably no more than one minute. This duty is exacting and demands both mental and physical output of the highest order.

Carcases inspected and condemned

OTHER FOOD-STUFFS CONDEMNED

Of the food inspected, the following was voluntarily surrendered. This class of food-stuff is examined on special request or in the course of routine visits to food premises.

55 tins meat	11 tins soup	120 tons various tinned food
63 tins vegetables	12 tins fish	3 lbs jam
101 tins fruit	5 tins pudding	12 lbs flour
12 tins milk	4 tins baby food	$\frac{1}{2}$ lb butter
		56 lbs cheese

SLAUGHTER OF ANIMALS ACT, 1933 TO 1954

There are 21 Slaughtermen holding licences granted by this Authority.

S E C T I O N V

HOUSING

The number of inhabited houses and flats in the area is gradually rising and now totals 9,852. New construction is gaining pace and shows a most credible increase since 1953, an increase which is mainly due to private developers. The average number of houses completed by the Council each year since 1948 is 61 and this year nil.

The total number of Council houses is now 1,124; private houses completed totalled 704, and thus 704 houses were available for occupation for the first time in 1962.

In view of the fact that private construction is high, that there is a turnover in Council tenants of approximately 70 per year, that there are few applicants on the housing lists with urgent need, and that present interest rates remain high, it is the Council's intention not to construct any houses during 1963.

Although the re-housing problem may now be considered to be a minor one, it is felt that there is still a need for bungalows for aged persons, the fulfilment of which would provide greater flexibility in the management of the Council's estates.

Under the House Purchase and Housing Act, 1959, there are now two types of grant available to owners for modernising houses.

1. Improvement Grants - Discretionary

These are discretionary but include works which apply to the house as a whole. Inspections are made regarding repair works and the application is then dealt with by the Council's Surveyor.

Thirteen applications were made for assistance and seven were approved. It is significant that these applications were made in the main by owner-occupiers. Total amount of grant - £2,699.

2. Standard Grants

These are obligatory and are to provide the sanitary essentials - bath, W.C., Wash-hand basin, hot water and foodstore. The administration of these Grants is controlled by the Chief Public Health Inspector. The number of applicants is steadily rising but it is considered more use would be made of this type of grant if loans by the local authority to the owners were readily available.

No. of Houses for which applications made	26.
No. of Improvements completed	19
Total amounts of grants	£1624.19.7d.

The number of applications for Certificates of Disrepair under the Rent Control Act, 1957, has continued to fall and may now be considered insignificant.

Application for Certificate of Disrepair	1
No. of "G" Forms checked at houses	1
No. of Certificates authorised	1
No. of Certificates refused	-
Notices of Proposal to issue Certificates(J)	1
Undertakings accepted "K"	-
Undertakings refused	-
Certificates of Disrepair issued	-

Caravans

The Caravan Sites and Control of Development that came into force during 1960 and since that time considerable efforts have been made to review and licence all sites in the area. Close co-operation is effected with the Surveyor's Department concerning the enforcement of planning control over new and existing sites.

Number of licensed sites	20
Total number of Caravans	60

Caravans in all cases are occupied as living vans for permanent occupation all the year.

Inspection of Existing Properties

Inspection of Dwelling-houses during the year.

1.	(a)	Total number of dwelling-houses inspected for housing defects (under Public Health & Housing Acts)	563
	(b)	Number of inspections made for the purpose	856
2.		Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	6
3.		Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not in all respects reasonably fit for human habitation	239

REMEDY OF DEFECTS DURING THE YEAR WITHOUT SERVICE OF FORMAL NOTICES

Number of defective dwelling-houses rendered fit in consequence
of informal action by the Local Authority or their officers 246

ACTION UNDER STATUTORY POWERS DURING THE YEAR(a) Proceedings under Sections 9, 10, and 16 of the Housing Act, 1936:

1. Number of dwelling-houses in respect of which notices were served
requiring repairs Nil
2. Number of dwelling-houses which were rendered fit after service
of Formal Notice:-
 - (a) by owners Nil
 - (b) by Local Authority in default of
owners Nil

(b) Proceedings Under Public Health Acts

1. Number of dwelling-houses in respect of which notices were
served requiring defects to be remedied 239
2. Number of dwelling-houses in which defects were remedied
after service of formal notices:-
 - (a) by owners 13
 - (b) by Local Authority in default of
owners Nil

(c) Proceedings under Housing Act, 1957 (Section 17)

1. Number of dwelling-houses in respect of which Demolition
Orders were made 6
2. Number of dwelling-houses demolished in pursuance of
Demolition Orders 9
3. Number of dwelling-houses closed 1

LEGAL ACTION

Case	Nuisance	Court Decision
No. 1.	Various	Application for Nuisance Order granted

SANITARY CIRCUMSTANCES OF THE AREA WATER SUPPLY

A piped supply of water extends throughout the area, with the exception of some isolated farms and cottages. The principal supplier is Warrington Corporation, but a small area of Cuerdley Parish is supplied by Liverpool Corporation.

Pollution still exists in a deep well source of supply, but the provision of suitable chlorination and de-chlorination equipment enables the supply to be continued. The scheme for the sewerage of what is a scattered Rural Area has been prepared and is being submitted to the appropriate authorities for their approval.

The number of houses without a proper supply of water within the house has been gradually reduced and the table below indicates how small these cases now are.

From Public Mains				From Private supplies, e.g. wells, springs, etc.		
PARISH				Direct to houses		
				No. of dwelling houses	No. of dwelling houses	No. of Population

Woolston.	1123	-	-
Total Whole District				9,848	4	9

RIVERS AND STREAMS

The area is traversed from north to south by two main streams - the Sankey Brook and the River Glaze. Across the southern boundary runs the River Mersey, the eventual outlet for these streams. There are several smaller brooks winding through the area, but none of these of any particular note.

Sewerage schemes have been developed in the more urban parts of the area and a noticeable improvement has already taken place in the streams. It is most essential that when pollution is reduced by the construction of proper sewerage schemes, new pollution is not allowed by development outside the scheme.

DRAINAGE AND SEWERAGE

The method of drainage from a large number of properties in the area consisted of treatment in a septic tank and discharging into the nearest ditch or stream. This effluent in all cases was unsatisfactory and without adequate filtration could not, of course, be satisfactory. Large numbers of these tanks have been replaced by the new sewerage schemes and no new installations are being provided unless they are built to a standard specification and provided with a suitable filter.

The position with regard to sewerage schemes as a whole may be summarised as below:-

Parish	Sewers	Conversions
Burtonwood & Collins Green	Completed	Completed
Croft	Scheme prepared. Date of completion not known	Very few
Cuerdley	Sewers completed	Completed
Penketh	Completed	In progress
Poulton-with-Fearnhead	Sewers completed	Complete by end of 1963.
Rixton Hollins Green	Complete except for 2 minor lengths	To be completed during the end of 1963.
Glazebrook	Sewerage scheme to be connected to new works at Irlam U.D. probably during 1963.	Completion by 1963.
Sankey	Sewers completed	In progress
Winwick Houghton Green	Scheme prepared	Completion date during 1963
Winwick St. Oswalds	Scheme completed	Completed
Woolston	Scheme completed	In progress

PUBLIC CLEANSING

The collection and disposal of refuse, together with its ancillary functions by the Local Authority, is under the control of the Chief Public Health Inspector. The collection service, which is weekly, is carried out by special-type refuse vehicles, with loader's cabs. Due to the fairly long distances that machines have to travel from the depot, the inclusion of the loaders in the driver's cab is obviously a desirable feature. Certainly the weather protection and additional safety provided appear to be thoroughly appreciated by the workmen.

The collection of pail contents is carried out weekly by a similar machine. A detachable tank is mounted on rollers inside the body, a method which simplifies both loading and unloading. Supplies of both liquid and powder disinfectants are carried in order that pail compartments and pails may be treated as required. This procedure is far from satisfactory, but is probably as effective as any other under the circumstances. The only solution to this problem is the conversion of the pail closets as rapidly as possible to a water-carriage system. This class of work has materially reduced and will shortly only be in use for the scattered properties.

All workmen are provided with protective clothing, and although this provision is by no means cheap, yet it is a feature that is now a necessity if workmen are to be encouraged to engage in this class of work.

The provision of dustbins and sanitary pails is carried out by the Local Authority as a rate charge and enables unsatisfactory bins and pails to be replaced with the minimum of delay. The storage of refuse at the home, pending collection, must obviously be in a hygienic manner, and this can only be effected by the provision of a proper receptacle. B.S.S. bins are purchased in bulk and delivered weekly. Weekly reports are received from each driver, of the bins and pails requiring replacement, the addresses are checked in a card index file, the bin or pail inspected, and delivery receipts are signed by the householder. Where a bin is being mis-used, a visit is paid by an Inspector, when the householder is warned that he will be held liable for replacement. Two sizes of bins are issued - $3\frac{1}{4}$ and $2\frac{1}{2}$ cubic feet, the size of bin being decided by the type of house and size of family.

A scheme for the quarterly inspection of vehicles by a sub-committee at which points are awarded for maintenance and cleanliness has provided a competitive spirit in this work, and the monetary prizes awarded appear to take second place to the pride which the winning driver takes in his achievement. This scheme has raised vehicle care and maintenance to a higher level and ensures that each driver becomes fully cognizant of what is required of him.

The disposal of dry refuse takes place at two tips throughout the area. A Track Marshall Refuse Control Model Bulldozer is used to excavate soil and cover the tipping sites. Wire netting screens are provided to prevent nuisance from blowing paper, and all reasonable steps are taken to ensure that the sites are satisfactory.

The gradually increasing number of houses of the semi-detached and detached type, and the conversion of hostel sites into flats has, because of long carries considerably increased the collection time since the end of the war. A special twice-weekly collection of refuse is made from certain sites, and in one case a daily collection is made. For these additional services a special charge is made.

Income from Trade Refuse Collections	£1,013.14.0.
--------------------------------------	--------------

Income from Refuse disposal	£36.10.0.
-----------------------------	-----------

Salvage

The direct collection of salvage has been confined solely to waste paper and cardboard. Due to the scattered nature of the area, it is not considered that other materials could be separated and sold at a profit.

The collection of waste paper is made by means of large covered trailers behind a refuse collection vehicle. The provision of a smart trailer serves a two-fold purpose - a good advertisement, and, secondly, an eminently suitable collection method.

Shops and large business premises are visited once each week by a special vehicle. The sorting of paper at tips is not as thorough or as satisfactory as one would wish, due to the soiling of paper after mixing with household refuse.

The amount of waste paper sold during the last three years was as follows:-

	Tons	Cwts.	Qrs.	£.	s.	d.
1960	222	0	2	1,606	7	4
1961	277	4	3	2,483	2	1
1962	234	7	2	1,974	9	4

A bonus is paid to workmen on the weight of paper collected each month above a fixed datum figure. Salvage prices have continued to fluctuate and unfortunately sales are restricted from time to time by the purchasing company.

Rodent Control

The recommendations of the Ministry of Agriculture and Fisheries are pursued in this sphere of work. One operative is engaged whole-time and one part-time, and the methods used are those recommended by the Ministry. Both operators and the general foreman have undertaken special instruction courses organised by the Ministry.

All local Authority's properties, refuse tips, sewerage works, etc., were regularly inspected and treated. The sewers and sewer ditches were test-baited and treated where necessary.

On private properties, treatment is carried out by agreement. Private houses are charged where costs are recoverable, but all business premises are charged the full cost of treatment. The two offensive trade factories are both classed as areas of reservoir infestation, and both have private contracts in force with service operators.

Farmers and threshing contractors are reminded annually of their duties when threshing ricks, by means of circulars, but, unfortunately, it is necessary to threaten legal action for full compliance.

Rodent control is a statutory duty of a Local Authority, and effective measures must be taken to ensure that the rat population is kept to a minimum. Contract schemes are undertaken for farmers and special premises; this service is expected to expand with the cessation of rodent contracts by the County Agricultural Committee.

STATISTICS:

The number of infestation treatments were as follows:-

	<u>Major</u>	<u>Minor</u>
Business premises	-	16
Private dwellings	-	252
Local Authority	-	8

In addition 112 manholes were test-baited.

ATMOSPHERIC POLLUTION

Regular observations have been made of all factory chimneys for smoke emission. The visits and advice of your Inspectors has resulted in a considerable improvement at various factories. New furnaces have been fitted in a wire rope factory; automatic stokers, new boilers, and conversions to oil firing have helped to reduce this problem.

Byelaws relating to the installation of suitable firegrates in new houses came into force on 1st July, 1958.

Probably the most potent factor affecting the use of smokeless fuels is that of price. Large numbers of so-called overnight burners have been installed mostly incorrectly, and are used to burn coal slack in a manner calculated to provide the most pollution.

VERMINOUS AND FILTHY PREMISES

The days when the serious infestation by bugs, of numbers of houses, seem to have gone, certainly so in this district. The residual toxicity of D.D.T. seems to have provided a long-awaited answer to the problem. Very few houses required treatment, and, of these, the infestations were not heavy.

OFFENSIVE TRADES

There are two offensive trades in the area, only one of which is in full production. The trades carried out are fat extraction, bone boiling, and glue making. One factory is also combined with a Knackers' yard and produces pet foods.

To prevent flies, each factory carries out spray patrol, whereby the whole of the premises are treated with D.D.T. insecticides. This system has proved of marked benefit.

Premises in Risley used for breeding maggots for use as fish bait, not legally an Offensive Trade, have been regularly visited to ensure that a reasonable standard of cleanliness and control is maintained.

This class of work takes up a surprising amount of inspectorial time, particularly in the warmer months of the year, and yet it is only by maintaining regular and continued visits that satisfactory results are obtained.

SANITARY ACCOMMODATION OF HOUSES AND SCHOOLS

Conversions are now being carried out in all Parishes where the sewerage scheme is sufficiently far advanced.

The position at the 31st December was as follows:-

W.C. Conversions completed at:-

Burtonwood & Collins Green	2
Croft and Risley	1
Padgate	10
Penketh	66
Rixton	2
Sankey	39
Wirwick	-
Woolston	2

Appropriate notices are being served on Owners of properties where conversions can be made and fifty per cent of the approved cost paid in each case. Where owners carry out such work voluntarily, a similar grant is made. Extensions and improvements have now been carried out to nearly all licensed premises, but difficulties exist where sewers are not available - particularly in Croft parish. Grants paid towards the cost of conversions total £1,397.19s.11d.

The number of pails in use:-

	Houses	Caravans
Burtonwood	21	4
Croft & Risley	112	29
Poulton	40	2
Penketh	56	4
Rixton	49	11
Sankey	12	-
Wirwick	31	5
Woolston	28	22
	<hr/> 349	<hr/> 77

SECTION VII

INDUSTRIAL AND COMMERCIAL CIRCUMSTANCES

Factories Act, 1937

There are now 42 factories registered in the area, the principal ones being engaged in tanning, light engineering, wire rope making and brewing. Routine inspections have been made and the attention of H.M. Inspector of Factories has been drawn to matters within his jurisdiction.

Particular attention has been paid to the standards of hygiene practised in the canteens. Some of these are maintained and run to the highest standards, but in others, constant supervision is necessary. A special approach is made to each manageress and staff to ensure that scrupulous attention is paid to personal hygiene. Circulars and posters have been provided for use within the canteens and kitchens.

Number of Canteens - 15.

Good co-operation has existed with all factory managements and in no case has there been any necessity for statutory action on any of the matters for which the Local Authority is responsible.

SHOPS AND OFFICES

Certain duties in the inspection of shops devolve on this Authority and certain other on the County Council. The inspectoral duties of the County Council have now been delegated to this Authority. The procedure is for half-yearly reports to be sent to the County on matters for which it holds responsibility for action to be taken where necessary. It is unfortunate that this procedure tends to discourage the Inspector concerned from taking a more than cursory interest in this sphere of work.

It has not been found necessary to take statutory action to secure any of the requirements under the purview of this Council, all recommendations having been dealt with informally.

SHOPS

<u>Type of Business</u>	<u>Numbers</u>

SECTION IX

PROVISION OF GENERAL HEALTH AND ANCILLARY
SERVICES IN THE DISTRICT.

(1) LABORATORY ARRANGEMENTS.

Public Health Laboratory Service and County Analyst's Department.

Pathological specimens, samples of milk, food, "swabs", etc., for bacteriological investigation are dealt with by the Public Health Laboratory Service, either at the Public Health Laboratory, Mount Pleasant, Liverpool, or the Laboratory at Monsall Hospital, Monsall, Manchester; the chemical analysis of water, milk and other samples of food and drugs is undertaken at the County Analyst's Department, County Offices, Preston.

(2) HOSPITAL ARRANGEMENTS.

(Liverpool Regional Hospital Board: Warrington and District H.M.C., and Winwick and Newchurch H.M.C.).

Although the Rural District contains no general hospitals within its boundaries, it is, of course, well served by the two major hospitals situated in Warrington County Borough, the Warrington Infirmary and the General Hospital, Warrington, which deal with general medical, surgical, obstetric and gynaecological cases, and those requiring specialist advice and/or treatment such as ophthalmic, orthopaedic, paediatric, nose and throat conditions, skin diseases and so on. Casualties and emergency cases are dealt with at both hospitals, although the former are more usually conveyed to the Warrington Infirmary in the first instance. Obstetric and Maternity cases are usually admitted to the maternity unit at the General Hospital, and in addition of course the more straightforward maternity cases requiring accommodation may be admitted to Victoria Park Maternity Home, Latchford, Warrington. Cases of infectious disease (other than smallpox), are catered for by the Aikin Street Infectious Diseases Hospital, which also has a block accommodating cases of active pulmonary tuberculosis. In addition to the above, hospitals administered by the St. Helens and District H.M.C., particularly Cowley Hill Hospital, St. Helens, and Whiston Hospital, not infrequently admit maternity cases for which beds cannot be made available in Warrington: and a small proportion of our residents are of course from time to time referred to specialists on the Staffs of the "teaching hospitals" attached to the Universities of Manchester and Liverpool.

Persons requiring advice and treatment, or simply observation and supervision for mental disorders or diseases may be admitted to Winwick Hospital, the one large hospital which is situated within the Rural District and one which is widely known and respected throughout the whole of the North Western corner of England. The majority by far of such admissions are now, as for many years past, on a voluntary basis, on the advice of general practitioners and psychiatrists who have been consulted in the first instance at the psychiatric out-patient clinic at the General Hospital Warrington, and Warrington Infirmary.

(3) AMBULANCE ARRANGEMENTS.

Full responsibility for the Ambulance Services provided under Section 27 of the National Health Service Act rests with the Lancashire County Council, as the Local Health Authority. This Rural District, enclosing as it does the northerly boundaries of the Warrington County Borough, for its greater part is serviced by ambulances of the County Borough operating on behalf of the County Council, the parishes so served being those of Penketh, Great Sankey, Burtonwood (part), Winwick (part), Croft, Poulton-with-Fearnhead, Woolston, and Rixton-with-Glazebrook. The remainder of the district is served directly by the County Ambulance Service from the ambulance stations at Newton-le-Willows (Newton-le-Willows 2013), which deals with the northerly parts of the parishes of Burtonwood and Winwick, and at Mill Brow, Widnes (Widnes 2121), which deals with the Parish of Cuerdley.

(4) TREATMENT CENTRES AND CLINICS.

School Health Service: School Clinics.

Since November, 1959, an all-purpose clinic in Green Lane, Woolston (in close proximity to the new Woolston County Secondary Modern School), has functioned as a School Clinic, with facilities for the inspection and treatment of minor ailments, dental advice and treatment; ante-natal care and infant-welfare sessions have also been held regularly, as also sessions for poliomyelitis vaccination and immunisation against diphtheria, whooping cough and tetanus. For a short period, also, it was possible to arrange for speech therapy, but unfortunately it has not been feasible to continue this as a result of the shortage of Speech Therapists.

The Clinic is staffed by a Medical Officer, Dr. H.G.M. Bennett, a Dental Officer, three School Nurse/Health Visitors, a Dental attendant, and a Clinic Clerk.

Child Welfare Centres.

Sessions are held at the Infant Welfare Centres detailed below. At these centres medical and nursing advice is available for all infants and for children of pre-school age, also for expectant mothers, and those recently confined, in relation to matters affecting their general health. Supplies of a variety of infant foods, vitamin preparations, etc., are also available at cost price, together with National Dried Milk, Orange Juice, and Cod Liver Oil, the "Welfare Foods," formerly distributed under the auspices of the Ministry of Food.

(a) BURTONWOOD:

Methodist Sunday School, Phipps Lane.
 Medical Officer - Dr. J.E. Jolley.
 Health Visitor in charge - Miss I. Heap.
 Sessions - Weekly, each Tuesday, 2.0-4.0 p.m.

(b) CROFT:

Memorial Institute, Mustard Lane.
 Medical Officer - Dr. G. Ellis.
 Health Visitor in charge - Mrs. E.I. Griffiths.
 Sessions - Fortnightly, alternate Mondays, 2.0-4.0 p.m.

(c) PADGATE:

Methodist Sunday School, Padgate Lane.
 Medical Officer - Dr. H.G.M. Bennett.
 Health Visitor in charge - Miss E. Atkinson.
 Sessions - Weekly, each Wednesday, 2.0-4.0 p.m.

(d) PENKETH:

Methodist Sunday School, Chapel Lane.
 Medical Officer - Dr. J.E. Jolley.
 Health Visitor in charge - Miss W. Henry.
 Sessions - Weekly, each Monday, 2.0-4.0 p.m.

(e) SANKEY:

Eagle Sports Club, Hood Lane.
 Medical Officer - Dr. J.E. Jolley.
 Health Visitor in charge - Miss K. Eustace.
 Sessions - Weekly, each Friday, 2.0-4.0 p.m.

(f) WINWICK:

Methodist Church Hall, Golborne Road.
 Medical Officer - Dr. J.E. Jolley.
 Health Visitor in charge - Mrs. E.I. Griffiths.
 Sessions - Fortnightly, alternate Thursdays,
 2.0-4.0 p.m.

(g) WOOLSTON:

School Clinic, Green Lane, Woolston.
 Medical Officer - Dr. H.G.M. Bennett
 Health Visitors - Miss E. Atkinson, Mrs. D.
 Creighton, Mrs. J. Chambers.
 Sessions - Weekly, each Thursday, 2.0-4.0 p.m.

During the year under review the following attendances were made at the above Welfare Centres:-

Number of individual children attending:

Born in 1962	554
" " 1961	422
" " 1957-60 (mean)	339
Total	<u>1,315</u>

Number of attendances made by children:

Under 1 year of age	8,112
1-2 years of age	1,329
2-4 years of age	1,265
Total	<u>10,706</u>

(5) MIDWIFERY ARRANGEMENTS

Domicillary. Three whole-time domicillary midwives and four district nurse/midwives are engaged on this work within the Rural District in the employment of the County Council, which is both the Local Health Authority and the Supervising Authority under the Midwives Acts. These nurses normally accept responsibility for cases residing within reasonable proximity of their homes, but the principle of the expectant mother's free choice of midwife (as of doctor), is well established. Each has a car at her disposal to enable her to respond quickly to urgent calls and to carry apparatus for analgesia.

The names and addresses of these ladies are:-

WHOLE-TIME MIDWIFE:

Mrs. M. Hindley, 147, Park Road, Sankey. Tel.No.
 Penketh 3511.
 Mrs. M.A. Lawton, 21, Marina Avenue, Sankey. Tel.No.
 Warr. 33236.
 Mrs. M.A. Taylor, 16, Hawthorne Grove, Paddington.
 Tel. No. Warr. 33664.

WHOLE-TIME NURSE/MIDWIVES:

Mrs. V.M. Gibbins, 300, Padgate Lane, Padgate. Tel. No. Warr. 34755.
 Mrs. K.M. McCarron, 20, Brookside Avenue, Sankey. Tel.No. Penketh 2147.
 Mrs. F.T. McConnell, 56, Haley Road South, Burtonwood. Tel.No. Newton 3217.
 Mrs. C. Price, 10, Arkenshaw Road, Croft. Tel. No. Culcheth 3373.

A total of 345 babies were born in their own homes during the year; with possibly one or two exceptions, their mothers were either actually delivered, or attended, by the midwives and nurse/midwives detailed above. Two cases of Puerperal Pyrexia were recorded during the year.

(6) HEALTH VISITING ARRANGEMENTS.

This work has been carried out by six whole-time and one part-time Health Visitor, who combine with health visiting duties those of School Nurse. These domicillary visits, so necessary from the standpoint both of the supervision and the health education of the families, are, of course, complementary to the work carried out at the Child Welfare Centre, as described above.

The names and addresses of the Health Visitors are:-

for Sankey, Penketh and Cuerdley:

Miss W. Henry, 38, Greens Road, Whiston, Prescot.

Miss K. Eustace, 5, Haigh Road, Widnes.

for Padgate, Woolston, Rixton and Glazebrook:

Miss E. Atkinson, 88, Whitefield Road, Walton.

Mrs. D.H. Creighton, 13, Higher Knutsford Road, Grappenhall. (Part-time).

Mrs. J. Chambers, 56, St. John's Avenue, Warrington.

for Burtonwood:

Miss I. Heap, "Maynard", Belvedere Road, Newton-le-Willows.

for Wirwick and Croft:

Miss E.I. Griffiths, 49, Golborne Road, Lowton, via Warrington.

(7) HOME NURSING ARRANGEMENTS.

Home nursing is undertaken by four whole-time nurse/midwives and one whole-time nurse.

The names and addresses of the Nurses are:-

Mrs. K. Briers, 18, New Road, Croft.
 'Phone No.: Culcheth 2520.
 Mrs. V.M. Gibbins, 300, Padgate Lane, Padgate.
 'Phone No.: Warrington 34755.
 Mrs. K.M. McCarron, 20, Brookside Avenue, Sankey.
 'Phone No.: Penketh 2147.
 Mrs. F.T. McConnell, 56, Haley Road Sth., Burtonwood.
 'Phone No.: Newton-le-Willows 3217.
 Mrs. C. Price, 10, Arkenshaw Road, Croft.
 'Phone No.: Culcheth 3373.

(8) HOME HELP ARRANGEMENTS.

This is a permissive service provided by the County Council through No. 10 Divisional Health Committee, and is one of the Local Health Authority responsibilities under the National Health Act, 1946. Its aim is to provide help in homes where such is required owing to the presence in the household of a case of sickness (including tuberculosis), of mental subnormality or disorder, an expectant mother (or one lying-in), or of a child under compulsory school-leaving age. The presence in the household of an aged person also constitutes a justification.

These arrangements are not free of cost to all those benefiting thereby, but in the majority of cases assisted, particularly those who are aged and infirm, no charge is incurred under the County Council's scale.

The Home Help Organiser, and the Assistant Home Help Organiser may be communicated with at the Divisional Health Offices, Wirwick (Tel. Warrington 33144).

During the current year a total of 61 Home Helps, all part-time workers, assisted 279 cases within the Rural District. The amount of help allocated varies according to the needs of each individual case.

(9) MENTAL HEALTH ARRANGEMENTS.

The district is covered for this purpose by three full-time Mental Welfare Officers, one a lady, who deals with the various aspects of mental health, including all cases in which investigation, supervision and appropriate action is required under the Mental Act, 1959.

The names and addresses of these officers are:-

Mr. F. Griffin, 79, Legh Street, Golborne.

'Phone No.: Golborne 563.

Mr. H. Andrews, 419, Newton Road, Lowton.

'Phone No.: Newton-le-Willows 3559.

Miss D.M. Bexon, 16, Whitefield Road, Stockton Heath.

'Phone No.: Stockton Heath 1202.

It will be appreciated that, owing to the character of the Mental Welfare Officers' duties, twenty-four hour cover is given to this type of work.

(10) ARRANGEMENTS FOR THE PREVENTION OF ILLNESS, CARE AND AFTER-CARE (INCLUDING TUBERCULOSIS) AND THE PROVISION OF CONVALESCENT ACCOMMODATION.

(a) Responsibility for the above rests with the Local Health Authority, partly on an obligatory and partly on a permissive basis; "illness" includes mental disorder. The scope of such arrangements is very wide, and includes all the methods of health education and propaganda relating to health matters, health visiting in the homes (including those of persons suffering from tuberculosis), the provision of nursing and ancillary equipment, the after-care of patients who have suffered from illness either at home or in hospital, and the provision of convalescent accommodation and rehabilitation where this is required, to enable those recently sick to regain full health and strength.

(b) Responsibility for the supervision of cases of tuberculosis in the homes and for that of family contacts, to ensure appropriate examination and advice by the Chest Physician, now devolves on a single health visitor, covering the whole of the Rural District, and working in the closest contact with the Chest Physicians at clinics in Warrington, Widnes, and Newton-le-Willows. The name and official address of the Health Visitor and details of the Chest Clinic sessions concerned with Rural District cases are given below:

Miss M. Monks, c/o Divisional Health Office, The Old Rectory, Winwick.

CHEST CLINICS:

Warrington General Hospital -

Sessions: Tuesday evening, 5.0-8.0 p.m.; Wednesday, 2.0-4.0 p.m.; Alternate Fridays, 9.30-10.30 a.m.

Widnes, Chapel Street -

Sessions: Monday, Tuesday and Friday, 1.30-3.30 p.m.

Newton-le-Willows Chest Clinic, Cottage Hospital, Bradlegh Road.-

Sessions: Monday, 9.0 a.m.-12 noon; Wednesday, 9.0 a.m.-12 noon.

(c) Chiropody. A most important measure on the prevention of illness and disability, affecting particularly the elderly and the handicapped, has been the initiation of a chiropody service for these groups, and also for expectant mothers, as the result of a decision of the Ministry of Health that such a Service might properly be provided by Local Health Authorities under Section 28 of the National Health Service Act of 1946.

Treatment of this character has for a number of years past been available in certain parishes through the good offices of the Warrington and District Council of Social Service, but the decision of the Ministry has now made possible a considerable extension of these facilities throughout the whole of the Rural District. Treatment is usually carried out at Clinics, or at the Surgeries of the Chiropodists concerned, who are employed (part time) on a sessional basis; but where patients circumstances are such as to preclude their attendance at a surgery or clinic, some treatment is carried out on the production by the patient of a certificate from a doctor, nurse or midwife that this is required.

(d) Health Education.

As regards Health Education (a very important and essential factor in the prevention of illness), it is pertinent here to emphasise that although some responsibility for this section of preventive medicine may be accepted (as has been the case) by the Local Health Authority, the permissive power of the Council as a Local Sanitary Authority to carry out measures of health education under Section 179 of the Public Health Act, 1936, is still extant and should continue to be exercised.

VACCINATION AND IMMUNISATION ARRANGEMENTS.

Vaccination against smallpox and immunisation against diphtheria, whooping cough, and tetanus, are carried out at the various Child Welfare Centres in the area.

During the year a total of 458 children under 15 years of age completed the full course of immunisation against diphtheria, of which 448 were under 5 years. In addition, 170 children received re-inforcement or booster injections.

The percentage proportion of the estimated child population under 15 years in an immunised state at 31st December, 1962, was 62% as against 68%, the comparable figure for No.10 Health Division.

340 infants under 1 year of age were vaccinated in 1962 against smallpox, giving a percentage proportion of 52%. A further 130 under the age of 5 years, 194 in the 5-15 group, and 306 over 15 years were also vaccinated for the first time. 756 re-vaccinations were performed.

POLIOMYELITIS VACCINATION

The programme for poliomyelitis vaccination started in 1956 and was further extended in 1961 to include all people under the age of 40. The following numbers of vaccination were carried out during 1962.

Primary

Children under 5 years of age	332
Children and other persons over 5 years of age .	456

Reinforcement

Children under 5 years of age	774
Children and other persons over 5 years of age .	2139

SECTION X

NATIONAL ASSISTANCE ACT, 1948.

The Local Authority carrying responsibility for the implementation of Parts III and IV of this Act is the County Council, and the administrative machinery, in this case also, is on a divisional basis. The main requirements, of Part III, relate to the provision of accommodation, both temporary and residential, for persons who are without lodging; and to Welfare Services in general for persons handicapped by infirmities such as Blindness, Deafness, Dumbness, crippling physical defects, and other disabilities of a severe and permanently handicapping character.

The approved scheme of the County Council in regard to Welfare utilises very fully the services rendered by the various voluntary agencies already in existence prior to this legislation.

Section 47 of this Act prescribes the procedure whereby aged and infirm persons, if not receiving adequate care and attention in their own homes, may, by a Court Order, be removed to a suitable hospital following a hearing by the Court of evidence in support of a certificate issued by the Medical Officer of Health after close consideration of all the circumstances of the case : whilst the later Act of 1949 amends the original procedures to make it speedily effective in cases of urgency.

Section 50 is of importance in that it places on the County District Authority the duty of arranging for the burial or cremation of the body of any person who has died or been found dead within the district when "it appears to the Authority that no suitable arrangements for the disposal of the body have been or are being made otherwise than by the Authority."

No action under either of these sections has been called for during the year.

SECTION XI.

THE CHILDREN ACT, 1948.

In the main, this Act provides for the care and welfare of children and young persons up to the age of 18 years who for one reason or another are deprived of normal home life, and it thus has an important bearing on the mental and physical health of such children.

The County Council, which is the Local Authority for the purposes of this Act, exercises its functions through its Children's Committee and the Children's Officer, who is responsible to the Committee for the efficient administration and day-to-day operation of the service, which is carried out on a regional or area basis. The Warrington Rural District lies administratively within the responsibility of the Children's Officer for the Leigh area.

Fortunately the days of serious neglect and wilful brutality have receded, but there still exists an appreciable number of cases where minor degrees of cruelty and neglect arise often as the result of indifference or simply inadequacy on the part of the parents. Such cases must give rise to concern in the minds of a number of different groups of social workers : Children's Visitors, Health Visitors, Inspectors of the N.S.P.C.C., etc. - and are not infrequently complicated by insanitary and overcrowded housing conditions, or the frank mental backwardness or defectiveness of parents and/or children. In order to integrate all viewpoints, to consider the action most appropriate and the officer in whose particular sphere of influence the probable remedy lies, case conferences are held which are attended by representatives of both statutory authorities and voluntary agencies which have the interests and welfare of children at heart. These conferences have been most valuable in enabling effective supervisory and remedial measures to be undertaken.
